

How to
Show your Tronex
Cutters
some
LOVE

***Getting the Best Performance out of your Cutters
Includes Taking Proper Care of them.***

**By following our Simple Guidelines you can
maximize the life & performance of your Tronex cutters.**

1. **Tip Protection Cap:** Keep cap on the cutter when not in use to protect the cutting edge.
2. **Storage:** Store properly in a cool, dry place.
3. **Cutting materials:** NEVER cut hard wire, memory wire or stainless steel wire with your Tronex cutters. These materials could leave a permanent nick in your blades which is not reparable. Cut only soft metals such as sterling silver, gold, gold-filled, sterling silver and copper.
4. **Non-Jewelry Usage:** Never use cutters for non jewelry cutting such as household, fishing or guitar strings.
5. **Gauge guidelines:** Always stay within the recommended gauge range for your cutter type. See our chart below for specific information.

Tronex Cutters Gauge Guidelines

Cutter Number	Cutting Maximum - Middle of Cutting Edges	Cutting Maximum - Cutting at the Tips
5222/7222	16 AWG	20 AWG
5223/7223	18 AWG	22 AWG
5513/7513	14 AWG	20 AWG
5112/7112	16 AWG	20 AWG
5113/7113	18 AWG	22 AWG
5082/7082	22 AWG	22 AWG
5612	12 AWG	20 AWG
5613	12 AWG	20 AWG
7812	12 AWG	20 AWG
