

Tronex RECONDITIONING

Go from
dull & well-worn:

To sharp,
good-looking &
working like NEW:

T R O N E X[®]

Tronex Cutters are "Built to Last", however, over time, after hundred's of thousands of cuts, cutters may benefit from **resharpening.**

Tronex offers a reconditioning service for Tronex-brand cutters. This low-cost service involves:

- **Disassembling the tool**
- **Blasting it clean**
- **Reassembling, resharpening,**
- **Replacing springs & grips, and**
- **Retesting**

The result is an almost new tool!

Reconditioning can sometimes be done two or three times before the cutting edges are worn away from repeated sharpening. Tronex also offers a low-cost resharpener service for cutter brands not made by Tronex.

Tronex is here to support our customers and to assist with questions.

**Contact our factory anytime to learn more about our
Reconditioning Services.**
